The Sam4s SPT-4806 vibrant & precise 15" projective capacitive multi-touch display is extremely durable in most environments including withstanding water contact, dust and grease.

The Sam4s Capacitive touch panels will activate with either a bare finger or a capacitive stylus preventing users from using pens, credit cards or sharp objects which potentially would reduce the life expectancy of resistive touch panels.

In addition the screen has a more vivid and crisp colour enhancing the quality of the POS user interface.

Incorporating the latest Intel Atom D2550 1.86Ghz fanless

processor, the Sam4s SPT-4806 provides all the power required for the most demanding POS software solutions.

Coupled with its on board SATA 360Gb HHD, ensures that the Sam4s SPT-4806 has the capacity required for all retail and hospitality environments.

With its spill proof multi-touch bezelless display, ergonomic design and available in high gloss black or white, the Sam4s SPT-4806 is one of the most stylish point of sale terminals in its sector.

With either traditional stand or VESA options for wall and pole mount provides greater flexibility of installation.
